

ECOx Smart Drive

WITTUR SMART DOOR DRIVES

ECOx DRIVE is Wittur's new-generation door electronic platform

Designed to **MAXIMIZE FUNCTIONALITY**, ECOx Drive introduces a full wireless configuration via the native WitturSmart app over Bluetooth.

Every door parameter is accessible from the WitturSmart app and can be configured from your smartphone or tablet, in just a few taps.

ECOx Drive sets a new benchmark in door electronics: one platform, zero compromise. Configure, monitor, and diagnose – all from your smartphone.

**NO WIRED TOOLS.
NO PHYSICAL DIP SWITCHES.
JUST PERFORMANCE YOU CAN CONTROL.**

How to use the ECOx Smart Drive

1 CONFIGURE ECOx DRIVE WITH WITTURSMART

All ECOx Drive configuration and diagnostics are handled wirelessly via the WitturSmart app – available for iOS and Android. No additional tools or wired interfaces required.

- Available for iPhone and iPad
- Available for Android devices
- Secure official download from App Store and Google Play
- Instant Bluetooth connection to the door electronic board

Download WitturSmart, connect to ECOx Drive via Bluetooth, and start configuring in seconds.

2 CREATE YOUR WITTURSMART ACCOUNT

Once downloaded the WitturSmart app, you're just few steps away from getting started

- Create your personal account directly in the app
- Get the confirmation email to activate your account
- Start using WitturSmart immediately

3

FULL WIRELESS CONFIGURATION

ECOx Drive replaces physical DIP switches and wired RS422 tools with a fully digital configuration experience via Bluetooth. Every parameter is accessible from the WitturSmart app – on site, from your smartphone.

- Adjust door movement performance, force limits, and braking independently for open and close direction
- Configure I/O mapping directly from the app
- Set up CAN communication
- Apply and store settings to the board with a single tap
- No additional hardware needed for configuration

4

ONE HARDWARE PLATFORM, MULTIPLE CONFIGURATIONS

ECOx Drive is built around the ESm door electronic board that supports multiple motor setups and supply configurations – reducing stock complexity and simplifying installation across your entire project portfolio.

- New motor and encoder for secure, error-free connections
- Copy and paste the same configuration across different lifts

5

REAL-TIME MONITORING & DIAGNOSTICS

ECOx Drive gives field technicians instant visibility into system status – directly from the WitturSmart app. Everything needed for commissioning and on-site troubleshooting is in one place.

- Live input/output status, voltage, inspection mode, and cycle count
- Motor temperature monitoring with automatic power reduction logic
- Full event log: information, warnings, and errors, stored and filterable by type
- Export event logs as files for remote diagnostics and service reporting
- Additional data views: learning status, temperatures, voltages, door position, movement times

6

SIMPLE FIRMWARE UPDATES VIA WITTURSMART

Keeping ECOx Drive up to date to the latest firmware – fully managed through the WitturSmart app, with no additional hardware.

- Select the firmware file directly within the app
- Progress tracked on screen
