Wittur doors

Augusta EVO

Compact Design, Smarter Control

Smart installation

Augusta Evo is the smartest Wittur commodity door for residential applications. Thanks to the compact structure, it easily fits even in limited spaces, maximizing the shaft space. The App-based control enables quick and intuitive configuration.

Hydra

Endless Flexibility

Unlimited possibilities

Hydra is our multifunctional door designed for maximum application flexibility. It features an almost unlimited range of executions and options, making it suitable for any kind of application, from residential up to office buildings and hotels.

Hydra 3000

Flexible modernization

High quality modernization

Hydra 3000 is a compact and versatile door specifically designed for elevator modernization projects. Its reduced dimensions and flexible configurations enable a high adaptability and a perfect fit to all shaft conditions.

Pegasus

Strong reliability and robustness

Multipurpose

Pegasus is our high-performance door engineered for intensive use in demanding environments. Combining robust construction with premium materials, it ensures exceptional reliability, making it the ideal solution for hotels, hospitals, public buildings and shopping centres.

Fineline®

Minimal Design, Compact Comfort

Compact Sill package

FINELINE® door features an extremely compact footprint and is designed to insert an automatic car door and an automatic landing door in a minimal depth. This door sets new standards with its compact size and reduced sill dimensions.

ECOBUS

Dynamic Adaptability

Very limited weight and dimensions

ECOBUS is the ideal solution for the modernization of existing elevators with manual car door and swing landing doors. The folding panels enable a maximum accessible clear opening in a very restricted space.

Special Projects

Combining flexible engineering and operations excellence for extraordinary projects

Wittur doors

Round, top or underdriven

Luna

Round shape

Luna round door is the ideal shape for prestigious and panoramic installations. It perfectly combines high-performance and good looks.

Straight underdriven

Nettuno

Light design

Nettuno is designed from the start with underdriven panels. This special execution lightens the design of panoramic elevators, achieves a higher aesthetic harmony and accounts for a clean shaft appearance with almost no visible mechanical component.

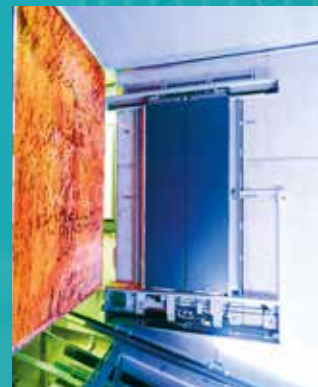

Sturdy and special

Taurus

Extra heavy duty

Taurus is our solution for extra heavy-duty goods elevator and can reach huge openings up to 5 metres. Its robust structure is made to last in the most demanding applications.

Optical coupling

SWS

Non conventional solution

Featuring optical coupling, SWS door system is a smart, unconventional solution for inclined elevators and for all those applications where traditional mechanical coupling is not possible.

Comparison chart

Flexible engineering and operations excellence

Wittur has been developing special elevator doors for more than 40 years. We work as partners in special projects to provide doors which fit with the original vision of the architect. At the same time we provide industrialised components with the same lifecycle and the same safety level of standard elevator doors.
