OL25

OVERSPEED GOVERNOR

The OL25 detects overspeed by its flyweight mechanism and engages the safety gear on the entire circumference of brake mechanism.

Simple mechanical design and remote control makes it the perfect choice not only for machine room but also for machine roomless applications.

OL25 OVERSPEED GOVERNOR

CHOICE CRITERIA

- Rated speed 1,0-2,5 m/s
- Max. travel height 145/120 m
- Rope diameter 6/8 mm
- Down-direction only
- Best mechanical overspeed governor for mainstream applications
- Remote control for MRL- applications
- Available for global major elevator norms and directives
- Available as a package with tension weights, accessories, fixings
- Complete traceability of the production of main components from raw material to final product with coding system stamped to each unit to enhance safety standard
- Very high safety factor which exceed EN 81 rules
- 100% tested and checked at factory
